SUMMARY

I am a Junior Developer with nearly two years of experience in ReactJS, JavaScript, and TypeScript, excelling in UI development and API integrations. My focus on crafting scalable and user-friendly interfaces drives my passion for performance optimization and collaboration in dynamic startup environments.

EXPERIENCE

Junior Developer Ephanti Inc.

05/2023 - 01/1970

Company specializing in software development.

Developed responsive user interfaces using React.js, enhancing application performance and user experience.

Collaborated with UX/UI designers to translate interactive designs into functional web applications.

Implemented features based on customer feedback and using micro-frontends, resulting in increased user satisfaction through intuitive design improvements.

Identified and resolved UI-related bugs, leading to a smoother and more reliable user experience.

Integrated RESTful APIs to facilitate seamless communication between front-end interfaces and back-end services.

Conducted extensive cross-browser testing across multiple devices, ensuring compliance with technical and design requirements.

Utilized Git for version control, fostering effective

Developed a streaming service interface using React, Redux, and SCSS, showcasing a wide selection of award-winning shows and movies.

Contact directory

The contact directory project is aimed at efficient contact management.

Created a GUI-based software with Python and MySQL for efficient contact management, including features for creating, updating, and viewing contacts

SKILLS

HTML | CSS | ReactJs | JavaScript
| TypeScript | Tailwind CSS | Postman | Vs
Code | Git | Redux | Zustand | Xstate | Sql
| Postgress

CERTIFICATIONS

CDAC Bangalore

03/2022 - 09/2022

PG-Diploma in Advanced Computing (PG-DAC)

Web-Based Technologies, Web-Based Technologies
in Java, Database Technologies, and Basics of Data
Structures and Algorithms.

EDUCATION

Btech

Modi Institute of Technology, Kota

08/2016 - 06/2020
